

1) Present-Participle

Go Going Run Running → my output for Run: "remain"

Think Thinking See Seeing → my output for See: "believe"

Go Going Move Moving → my output for Move: "remain"

2) Plural

Cat Cats Car Cars → my output for Car: "Vehicle"

child children man men → my output for man: "man"

dollar dollars dog dogs → my output for dog: "cat"

We can see in the first group it actually didn't do very good for these kind of examples for 1-best at least. For second group for the first word we see that it returned vehicle which is similar to car but it wasn't the correct answer and for second it returned the right answer and surprisingly for third one instead of dog it returned cat which interesting! ☺
